MAY 2024

TID ROLLOVER FOR ALL PREPAID METERS, **ARE YOU AWARE OF THE** **NOVEMBER 2024 DEADLINE?**

WHAT IS TID?

It is a unique token identifier (TID) which is coded into the token that you purchase from any vending point or outlet for your prepaid meter. Currently, the identifier is calculated as the number of minutes that have elapsed since the date of 1993, and due to the limitations of the 24 bit field used by these identifiers, the value will roll over to zero, making all tokens purchased after 24 November 2024 invalid.

WHAT IS THE SOLUTION?

A key change token (KCT) has to be physically entered into each meter. If the prepaid meters have not been upgraded by November 2024, then the meter will not accept any new tokens and the meter will be functionless. This is applicable to ALL prepaid meters in the country- electricity, water, and gas; Municipal/Eskom or privately owned.

WHAT TO DO?

Don't panic! All the prepaid meters on our database have been updated and will continue working as normal. If you're not one of our lucky customers then ask your service provider if they are aware of this impending threat. If they aren't, then do not hesitate to contact us. Our call centre is always ready to assist customers, and our team of qualified and skilled technicians have assisted thousands of customers through this process.

INTRODUCING THE NEW **HEXING WATER METER**

ABOUT:

- Tests have shown that the internal battery of the meter will last 7 – 12 years (dependent upon usage) and is incredibly accurate.
- PMD has been supplying Hexing products into the South African market for many years, and have had excellent product support from them.

WHY HEXING?

- Quick and easy communication between the keypad and the meter,
- An integrated sealed design / all in one meter,
- The meter is ultrasonic (no moving parts)

REMINDER!

There are upcoming municipal tariff increases!

Due date: 1st July 2024.

OUR COCKTAIL & SNACKS EVENT

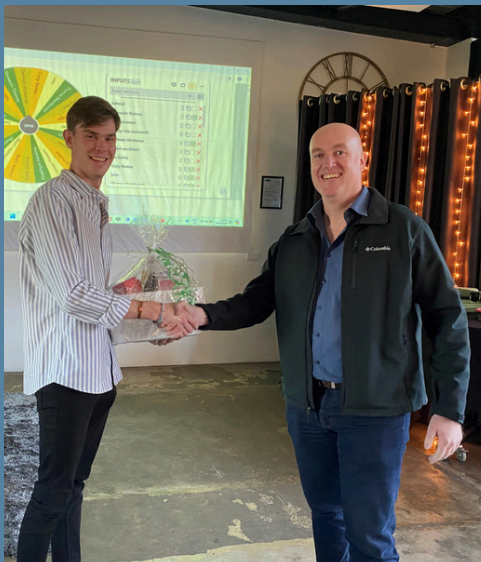

MAY 2024

On May the 9th, PMD hosted a cocktail & Snacks event for some of our managing agent clients in Cape Town.

Its aim was not just to have fun but to also generate more awareness of the impending threat of the TID Rollover, as mentioned above.

PRIZES WERE WON!

LAUGHS WERE SHARED

COCKTAILS WERE HAD!

MAY 2024

HAPPY BIRTHDAY

POWER MEASUREMENT!

28 years of Power Measurement!

On the 17th of April, all the branches of Power Measurement and Distribution celebrated the 28th birthday of the company.

On the right, colleagues at the head office in George can be seen celebrating this special occasion!

Celebrations all around!

Our Cape Town branch enjoyed the celebration with home made cake made by Pam, the branch's office administrator!
